

Granting permission for Broadband Over Power Line (BPL) will effectively destroy the Majority of the Amateur Bands, thus losing a free and needed service of emergency communication that the Amateur Service has always provided. Please give serious consideration to the proof that the Amateur Radio Relay League (ARRL) has provided to you. The Noise generated by BPL operating within the power guidelines makes communication impossible without heavy amplification of the signal. I am a 100% service-connected disabled Veteran and this is my only real hobby. Please don't take it away from me. Thank you.
